

Brugunandan Reddy M V

VMware Administrator

Phone: 6362017355 | **Email:** brugunandan003@gmail.com

CAREER OBJECTIVE:

To work as a VMware Administrator in an IT environment where I can utilize my hands-on experience in virtualization and VMware Cloud Foundation (VCF), along with strong troubleshooting skills, to support stable and efficient infrastructure operations.

PROFESSIONAL SUMMARY:

- Around 5 years of IT professional experience mainly focused in IT infrastructure management. Worked as VMware/System Administrator and working knowledge on various domains like – **VMware Administration**.
- Good experience with **VMware VCF Platform**.
- Architected and deployed a full-stack **VCF environment** and reducing infrastructure provisioning time through **SDDC Manager automation**.
- Managed **Lifecycle Management (LCM)** for the entire **SDDC stack, ensuring zero-downtime upgrades of ESXi, vCenter, and NSX components**.
- Configured and optimized Workload Domains for **high-performance workloads and improving resource utilization**.
- Working on VMware vCenter management, vSphere administration, managing virtual machines under Datacenters all over sites located in different geographical locations.
- Administered VMware **ESXi 6.x/7.x/8.x** environments via **vCenter Server**, handling **FT, virtual networking, storage management, vMotion/SvMotion, V2V and P2V migrations to ensure high availability and performance**.

SKILLS:

- **VMware vSphere 7/8**
- **VMware VCF**
- **RAID**
- **Networking**
- **Storage**
- **VMware vSAN**
- **Windows**
- **ServiceNow**

WORK EXPERIENCE

VMware Administrator | IBM | September 2021 – Present

ROLES AND RESPONSIBILITIES:

CLOUD MIGRATION & VMWARE RESPONSIBILITIES:

- Worked on **VMware Cloud Foundation (VCF)** operations, including **SDDC Manager** for lifecycle management, workload domain management, and **coordinated patching/upgrades across the stack**.
- Executed **VM migrations from VMware environments to private/hybrid cloud platforms**, ensuring minimal downtime and adherence to migration plans
- Validated post-migration results by monitoring VM performance, application availability, and system health.
- Troubleshoot **migration failures, VM performance issues, and post-migration connectivity problems** using logs, vCenter events, and OS-level diagnostics.
- Good understanding of **virtualization, compute, storage, and networking**
- Assessed system readiness before migrations by checking **compute, storage, network, and OS compatibility to ensure a smooth transition**.
- Expertise in **VMware vSphere, vCenter Server, and ESXi (6.x, 7.x, 8.x) administration**.
- Managed **VMs across ESXi hosts improving uptime to Maximum** across enterprise and global datacenter environments using **vCenter Server**.
- Performed **VM lifecycle management** including **provisioning, cloning, snapshots, and resource allocation** (CPU, memory, storage).
- Executed **ESXi host patching, upgrades, and firmware updates on HPE servers, ensuring system stability and compliance**.
- Configured and managed **VMware Distributed Switches, Port Groups, and VLANs** to support secure and scalable networking.
- Utilized VMware features such as **vMotion, Storage vMotion, HA, DRS, SDRS, and Fault Tolerance to ensure high availability and load balancing**.
- Performed **VM backup and restore operations to support business continuity and disaster recovery**.
- Led end-to-end **P2V and V2V** migrations using **VMware Converter**, ensuring seamless workload transitions.
- Built and deployed Windows servers using **templates and cloning techniques**, optimizing provisioning time.
- Planned and executed **scheduled maintenance activities including server reboots, upgrades, and patching with minimal service disruption**.
- Monitored system performance and ensured availability of applications and services across environments.

- Managed access control and security on shared resources by administering user and group permissions.
- Experience in VMware vRealize operations.
- VMware vSphere **Backup and replication**.
- Experience with PowerCLI.
- Firmware and **Bios upgrade for HP and Dell hardware**.
- Creating profiles and applying the profiles to the blades.
- Performed **log analysis and troubleshooting using vCenter tasks, events, and alarms to resolve infrastructure** issues efficiently.
- Performed virtual disk management including adding new virtual disks and extending existing disks, along with hardware monitoring of IBM servers to ensure system performance and availability.

VMWARE VROPS:

- Deploy Aria Operations and integrate with vCenters
- Configure the Alerts and notifications
- Create view and report templates
- Generate reports for customer infrastructure for capacity analysis
- Configure Dashboard for better visibility of infra details.

EDUCATION:

BE Civil Engineering AIT Chikkamagaluru 2017
